

Multi-feed Auto Soap Dispenser System

Multi-feed auto soap dispenser system - the smart system which allows one to install up to 6 auto soap dispensers above the counter, with one centralized soap tank. The fill port is equipped with a low soap level and overfilled protection indication LED light and sound.

With a 6-liter refillable soap tank, this is the solution for big construction projects and high traffic places. Now imagine the maintenance cost you could save by adopting our smart system!
